

Helping You Save Money

Track and manage all of your mobile assets from a single powerful platform.

01

Idling Time Reduction

Idling is a major factor that causes increased fuel consumption. Just **15 minutes** of idling can lead to a loss of about **1 litre** of fuel!

02

Improving Driver Behaviour

Aggressive driving (speeding, rapid acceleration and braking) wastes gas. Fluid can lower your gas mileage by roughly **15% to 30%** at highway speeds and **10% to 40%** in stop-and-go traffic.

03

Maintenance

Available data can tell you when you need repairs, when warranties are about to run out, and when a vehicle may have changed from an asset to a liability.

04

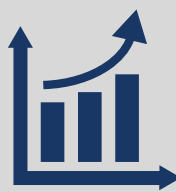

Reduce Labour Costs

It is estimated that drivers spend between **4.5 to 23 minutes** per day filling out paper logs. Eliminating this time results in **18-92 hours** of time saved per year, per driver.

Carriers spend roughly 3.5 minutes to file each paper logbook they receive. With ELDs this administrative duty is eliminated.

05

Drivers With ELDs

\$1340 of additional revenue is earned per driver per year > reduced violations **34% - 50%**.

06

Identifying Unproductive Time

Get insights into what blockages exist within your organization, coupled with active process development, we can suggest quantitative measures to limit and recoup losses to revenue.

52% Improved Customer Service
